

IN THE ABSTRACT

Please amend the Abstract as follows:

~~--The invention concerns a~~ A method of transcoding digital data coded according to a first coding mode into digital data coded according to a second coding mode, ~~characterized in that it comprises the steps of: -~~ The method includes detecting (E1) the inactivity of resources useful for the transcoding, ~~[[-]]~~ and transcoding (E4) the digital data coded according to the first coding mode into the digital data coded according to the second coding mode, when the inactivity is detected. ~~(Figure 3)~~
